

# How big is big?

Developed area of Foothills fueling stations: I-70, Hwy 74, Hwy 285  
(includes navigation, store, fuel islands, parking)

Box plot of area for Foothills fueling stations (N=32)

These are all the gas stations in the Foothills, from the Hogback to Georgetown and Bailey, representing all three main highways and the communities they connect. Evergreen itself has 8 stations along 8 miles of Hwy 74.

**The developed area of the proposed El Rancho QuikTrip #4288 would be more than 4.5× larger than that of the average of 32 existing stations, and more than twice as large as the largest.** It would be almost 1/3 the size of the regional Travel America truckstop at I-70 in Wheat Ridge (not included in the average).
